Books are full of memories, such that relate to our childhood and adolescence, and also such that have to do with the sensual quality and the beauty of the written word between the covers of a book. During this workshop we want to deal with the basic material of books, paper which we will make ourselves, and also deal with text, illustrations, the organisation and typography of stories and messages, and the process of making books and artzines, artist publications in magazine format. Our inspiration should be things we find, and handiwork our method – for creating individual books and small editions.
